

AI Repurposing Sprint – Hasouba

One Idea, a Week of Content

1. Pick One Insight

Insight: Choosing the right laptop depends on the user's needs, not just the laptop's price or specifications.

A student, engineer, programmer, and gamer all have different requirements. Therefore, the best laptop is not always the most expensive one, but the one that matches the user's needs and budget.

2. Repurpose with AI

A. Short LinkedIn Post

The most expensive laptop isn't always the right laptop for you.

Before buying a laptop, ask yourself: What am I going to use it for?

A student's needs are different from an engineer's, a programmer's, or a gamer's.

That's why at Hasouba, we start by understanding your usage and budget, then recommend the laptop that actually fits your needs.

The right laptop starts with your usage, not its price.

B. Article Outline

- Title: How to Choose the Right Laptop for Your Needs
- Introduction: Why choosing a laptop based only on price or specifications can lead to buying the wrong device.
- Section 1 – Understand Your Usage: Studying and everyday tasks; Programming; Engineering and design; Gaming; Professional workloads.
- Section 2 – Match the Specifications to Your Needs: Processor; RAM; Storage; Graphics card; Display.
- Section 3 – Don't Pay for Features You Don't Need: Buying the highest specifications is not always the smartest choice.
- Section 4 – Consider Your Budget: Balance performance and price when choosing a laptop.
- Conclusion: The best laptop is the one that provides the performance you actually need within your budget.

C. 60-Second Video Script

Scene 1 – Hook

"Looking for a new laptop? Wait! Don't buy one just because it has an i7 processor or 16GB of RAM."

Scene 2 – The Problem

"Because a student's needs are different from an engineer's, an engineer's needs are different from a programmer's, and gamers have completely different requirements."

Scene 3 – The Solution

"Before choosing a laptop, you need to ask yourself two questions: What will I use it for, and what's my budget?"

Scene 4 – Hasouba

"At Hasouba, we start by understanding your usage. Then, we help you choose the specifications that actually fit your needs, so you don't pay for features you don't need."

Scene 5 – CTA

"So instead of asking, 'What's your most expensive laptop?' ask, 'What's the best laptop for my needs?' Hasouba – Helping you choose the right one."

3. Fact-Check & Voice-Check

Fact-Check

- Laptop requirements vary depending on the user's workload.
- Students, engineers, programmers, and gamers can have different hardware requirements.
- Higher specifications usually come at a higher price.
- A more expensive laptop is not automatically the best choice for every user.
- Recommendations should be based on the user's needs, budget, and the laptop's current specifications.

Voice-Check

- Professional and friendly.
- Simple and easy to understand.
- Suitable for Hasouba's target audience.
- Focused on educating customers rather than simply selling products.
- Consistent with Hasouba's customer-focused brand voice.

4. One-Week Content Plan

Day	Platform	Content
Saturday	LinkedIn	Publish: "The most expensive laptop isn't always the right laptop for you."
Monday	LinkedIn / Blog	Publish: "How to Choose the Right Laptop for Your Needs"
Wednesday	Instagram / Facebook / TikTok	Publish the 60-second video about choosing the right laptop.
Friday	Instagram Stories	Ask: "What do you use your laptop for: studying, programming, engineering, or gaming?"

Content Goal

Build trust with the audience by educating customers about how to choose the right laptop, while positioning Hasouba as a brand that helps customers make the right decision instead of simply selling the most expensive device.
